

- Higher R-Value - 3.9 per inch (at 75°F) ASTM C 518-76 per inch of thickness delivers significant heating and cooling cost savings.
- Full Coverage, 0% Shrinkage in sidewalls ASTM C951, Par 8.5
- Air Krete is a highly efficient insulation that is pumped into all exterior wall cavities. Air Krete fills where others cannot - Since Air Krete is injected like shaving cream it is easily able to flow and fill around electrical conduits, outlets, window and door casings and penetrates into cracks and crevices, completely sealing against air infiltration. It creates a draft-free infiltration barrier.

Air Krete®      Blown Cellulose      Glass Fiber Batts      Blown Wool

Blue area indicates air infiltration areas.
