

SPECIAL REPORT

There's a **NEW TERMINATOR** in town...

Home owner's are witnessing the extermination of termites without an exterminator on site.

Distressed termites nesting in the home cavity walls are crawling out and dying due to the de-oiling effect of Air Krete's main ingredient, Magnesium Oxide .

Air Krete is the most environmentally safe insulation product on the market today. Air Krete does not burn, smell, shrink, nor emit harmful gases. It is an inorganic substance made with Magnesium Oxide which actually acts as a CO₂ scrubber and is pest and rodent resistant.

What is your safety, YOUR HEALTH
your comfort & your world worth?
