WHAT DO I GET FOR \$42K?

You will be the **ONLY** Licensed AirKrete® Dealer in Your Area.....

NO COMPETITION...So you can actually make a profit!

FREE AirKrete® Leads FOREVER from the AirKrete® Website for YOUR AREA!

FREE Technical Advice and Assistance 7 Days a Week!

Training INCLUDED!....Up to 5 days of Intensive training for Certification of up to 4 Trainees at Weedsport NY
Free lodging included at 8746 Weedsport Sennett Rd!

Refurbished Equipment Program- Never Be Down & Out because of a Broken “Gun” or Broken Pump and have to ship it back to AirKrete® and wait and wait and wait while it is repaired and then shipped back to you...**INSTEAD**... AirKrete® ships Pre tested refurbished equipment to your location to insure minimal down time (arrival time depends on location and shipping availability)!

American Made, Industrial, portable **Air Compressor** with coalescing filters for **OIL FREE “CLEAN”** air capable of running the air driven AirKrete® pumps, air driven mixers, and at two to three “Guns” simultaneously for larger projects. The two-stage pressure lubricated Air Compressor has a fan cooled belt guard mounted after cooler heat exchanger, which condenses up to 70% of the water vapor. The water separator, which filters the compressed air to three microns, removes the excess water and removes up to 40% of oil aerosols before the compressed air, enters the 30-Gallon Air Tank.

Fail Safe Soft Start Variable Frequency Drive custom mounted on the portable compressor which will accept single phase 220 Volt AC power and convert it to 220 Volt AC THREE PHASE – Allowing usage of a high torque 3 Phase motor. It has built in Motor Protection, which includes- Overload Protection, Current Imbalance Protection, Over/Under Voltage Protection, Ground Fault Protection, and Phase Loss Protection. VFD is Fully Programmable with on board diagnostics with “Plain English” fault display on keypad. NO Gas Engine NOISES, FUMES, AND FUEL EXPENSES, or Health Hazards. The VFD has the ability to accelerate a three-phase motor from zero speed to full speed over an adjustable period of time without exceeding the motor’s full load amps- resulting in minimizing the impact on the customer’s utility power or minimizing the size of a generator if you elect to use one. Finally, the VFD will reduce the STRESS on the compressor when starting resulting in lower mechanical wear and tear, prolonging compressor, belt and pulley life.

AirKrete® Custom Portable Air-Operated Diaphragm **Pumps with Tranquilizers** for nearly “Surge Free” Flow resulting in steadier pressures MANDATORY for AirKrete® creation. The “Gut” of the two pumps with tranquilizers is stainless steel for a LIFETIME of performance unlike much cheaper Aluminum Pumps that will be eaten away by the corrosiveness of the Expanding Agent or the Abrasiveness of the Cement and unable to handle the thicker viscosity of the cement slurry.

One Patent Pending NEW AirKrete® “GREENsulation™” “Applicator” with “NEW TECHNOLOGY UPGRADE” custom built by AirKrete® with four application hoses and **250 feet of Insulated Delivery Hose Line** with 3 calibrated empty drums and 3 closed drums to make AirKrete® along with Mixer, custom barrel mount strap, mixing rod & stainless steel shaft with two Jiffler Mixing Wheels and Digital Scales.

Marketing & Technical Downloads Along with Promotional & Advertising Marketing Including Power Point Presentations, Ads, Logos, Brochures, Sign and Banner.
